Profile Summary

I am a self-driven full-stack developer with a robust foundation in C#, ASP.NET Core, ASP.NET MVC, Web API and MySQL. My expertise extends to front-end development, where I excel in creating responsive and efficient web applications. I leverage a variety of coding languages and frameworks, including HTML, CSS, TypeScript, and React, to build user-centric solutions that align with business objectives. I am eager to find challenging opportunities within a dynamic company where I can contribute to success and engage in mutual growth.

Technical Skills

- **Front-End:** HTML, CSS, TypeScript, React, Next.js, SASS, Tailwind CSS.
- **Back-End:** C#, ASP.NET Core, ASP.NET MVC, Web API, MongoDB, MySQL.
- **Others:** GitHub, Git, Visual Studio, Supa base, Restful APIs, Open API

Experience

Fiverr — Freelance Web Developer   *July 2023 – present*

- Developed user-friendly websites using HTML, CSS, and JavaScript.
- Utilized version control systems, primarily Git, for project management.
- Integrated data from various backend web services and databases, using REST APIs.
- Optimized website performance, reducing load times by 30%.

V2X Inc — Engineering Technician   *May 2022 – June 2024*

- Maintained an organized database of engineering documentation and records.
- Participated in team meetings to discuss project objectives and progress.

Projects

- **PizzPyie — Pizza delivery** | HTML5, CSS3, TypeScript, React.js, Redux, SCSS, RESTful API
    - View Website / GitHub Repository
    - Implemented seamless navigation with React Router, enhancing user experience.
    - Optimized performance by implementing lazy loading for images and components, reducing initial load time by 40%.

- **Mchuzi_Mix — Food recipe** | React.js, JavaScript, HTML, SCSS, Routing
    - View Website / GitHub Repository
    - Developed a full-fledged food recipe platform with functionalities like searching, pagination, bookmarking, and local storage.

- **Cimeflix — Movies App** | HTML5, CSS3, TypeScript, React.js, Redux, SCSS, RESTful API
    - View Website / GitHub Repository
    - Developed a movie app with features like movie search, detailed movie information, and user reviews.

Education

- Kyambogo University
    - Diploma in Mechanical Engineering, December 2017

Extracurricular / Certifications

- The Complete JavaScript Course from Zero to Expert – Udemy
- The Ultimate React Course: React, Next.js, and Redux – Udemy
- CPR AED Certificate – American Heart Association
